

RedLock Cloud 360™ Platform

Comprehensive Visibility

View your multi-cloud infrastructure environment from a single pane of glass.

Policy Monitoring

Define policies based on industry standards and continuously monitoring for violations.

Anomaly Detection

Automatically detect suspicious user and network behavior using machine learning.

Contextual Alerting

Leverage highly contextual alerts for prioritization and rapid response.

Cloud Forensics

Go back to any point in time and investigate issues within seconds.

Compliance Reporting

Report on risk posture to your management team, board of directors, and auditors.
