

Archangel Cyber

Your partner in cybersecurity defense and
technology success

Company Summary

- Founded in 2017 as a pure-play service oriented cybersecurity and IT consulting firm.
- Focused on three primary service markets:
 - Underserved markets in need of cybersecurity expertise and guidance
 - Firms with established information security programs, mired by complexity and struggling to maintain a balance between security, function and compliance
 - Partner IT firms seeking assistance with new client acquisition, regulatory guidance and public sector procurement challenges

Vision

The vision for Archangel Cyber is to become the premier cybersecurity and technology advocate for organizations facing the challenges of the digital age. Assisting with safe, efficient technology adoption and thwarting cybersecurity attacks across the threat landscape.

Mission

Our mission is to advance the safety and efficiency of customers, partners, clients, and citizens by working with organizations in both the public and private sector. We work to design and implement practical cybersecurity and technology strategies to ensure client success. Our primary focus is on addressing challenges holistically, striking the right balance between technical and non-technical controls.

Vision and Mission

Primary Consumer Offerings

- Cybersecurity “Shield” products focus on strategies for effectively addressing security challenges within specific verticals:
 - Critical Infrastructure
 - Education
 - Emerging Technologies/Smart Cities
 - Public Safety
 - Executive Protection
- Our vCISO service offering provides immediate expert assistance for organizations that: are between CISOs, needing ad-hoc assistance or simply cannot justify having a full-time CISO on staff. Utilizing this service gives you the flexibility and expertise you need, bringing a team of cybersecurity professionals to the table to solve your organization's most complex problems.
- Engagements are flexible by the hour or on-demand for a year or more.

Partner Services

- Our services provided to partner IT/Cybersecurity firms focus on the following areas:
 - New Client Acquisition:
 - Let us help you tell the story. Our real-world experience with establishing security programs from the ground-up, making IT more efficient, gathering intelligence, protecting dignitaries and facing threat actors head-on provide us with a unique perspective to help you establish “why” they should bring you on board.
 - Regulatory Guidance
 - IT and security regulations can act as a major blocker for the adoption of new technologies. Concerns can range from the real to the perceived or misinformed. Let us bring our experience with conducting audits and even enforcing and writing regulations to the table for your internal or client driven discussions.
 - Public Sector Procurement
 - The public sector offers enormous opportunity to those that are willing to wait or know how to navigate often challenging procurement processes. Our consultants have the experience and expertise necessary to help you navigate these processes and gain the purchase vehicles necessary to tap into this important market.
