# Choose your SaaS. Choose your Security.

Avanan offers the most complete, defense-in-depth security solution for the cloud. From data leakage prevention and malware scanning to encryption and behavior monitoring, Avanan provides the layers of protection not provided by your SaaS application alone.

# The #1 concern with cloud adoption is security

How will you make money on SaaS opportunities?

As a trusted advisor for security, how do you help customers adopt cloud SaaS in a secure manner?

Would you like to leverage your existing line card to do this?

## WHY AVANAN?

Avanan is not another point solution and will not compete with your existing line card. Avanan allows you to leverage your existing logos to help secure the growing cloud SaaS market.
